Dear Ms. Falck:

Thank you for your letter of September 6 expressing your concerns regarding the CIA improvement and entrance onto Route 123. We, too, share the same concerns that you have raised in your letter. The following steps will be taken to be sure the need for six lanes is presented to the citizens:

STAT

1. We have advised our consultant engineers, Dewberry and Davis, to immediately prepare a supplement to the study that has been completed for this entrance. This supplement will show the provisions clearly for the future six lanes.
2. After the environmental assessment has been completed and a meeting held by the CIA, an Ad Hoc Committee, and all of the citizens in the area, a decision will be made regarding the type of development. Whatever that plan is, it will either provide for the future addition of lanes to provide six through lanes or it will contain the need for six lanes as a part of the construction. To further document the need for six lanes, the contract plans will be drawn to reflect the future addition of the lanes. These plans will be made a part of the permit necessary for the CIA to work on the Commonwealth's right of way.

I feel these steps will ensure us, the citizens, and Fairfax County of the intent for the traffic service in this area.

We are proceeding with the development of the environmental document as quickly as possible and look forward to an early resolution to this matter.

Sincerely,

Harold C. King, Commissioner

SUBJECT: Proposed Agreement between CIA and VDH&T

Dear Commissioner King,

This letter is in response to your letter to me dated August 14, 1984, and previous correspondence between VDH&T and Mr. Shiva Pant, Director of Transportation for Fairfax County.

In your letter, you have indicated that the Department will proceed to prepare an environmental assessment which will recognize that Route 123 near the CIA entrance will be six-laned (using funding from the CIA) in the event the traffic management plan does not succeed in limiting peak period traffic ingress and egress to existing levels. The assessment will also recognize that even normal traffic growth will necessitate the six-laning of Route 123 by the year 1989. I hope you recognize that in the latter event, the limited VDH&T funds available for projects in Fairfax County may make it difficult to have this need met by 1989.

If the Department feels that execution of the subject agreement prior to preparing the environmental assessment is essential, I would like to be assured that any permits approved by VDH&T for roadway work in this area also show VDH&T approval of the limits and scope of the six-laning of Route 123. This would avoid delays at a later date when the six-laning is eventually pursued either using CIA funds or State funds. We continue to be concerned that agreement has not yet been reached on a traffic scheme that will be initially implemented. I hope that such consensus can be reached soon.

Thank you for your assistance in this matter.

Sincerely,

Nancy K. Falck
